

WINDOWS

RIVA AWS 70.HI

Super-insulated punched window RIVA AWS 70.HI in custom design. A punched window is a hole-like opening that has been intentionally fabricated for better visibility. The punched window RIVA AWS 70.HI is an extremely functional module for versatile implementation. For example, it can be also manufactured as round window, arched window or as a free-form window.

The high insulation properties of the punched windows are provided by an innovative thermal insulation principle in the glass rebate and through extended insulation zones with foam composite insulating bars. The punched windows can be combined with the RIVA ADS door line.

Product information:

- Suitable for use in private apartment and private home construction, as well as in commercial buildings
- Extended insulating zone with foam composite insulating bars
- Innovative principle of thermal insulation in the glass rebate

DESIGN SPECIFICATIONS

Face width	91 mm
Face width window frame min. - max.	51 mm
Face width casement frame min. max.	40 mm
Face width mullion min. - max.	76 - 250 mm

TECHNICAL SPECIFICATIONS

Fall prevention	yes
Barrier-free operating force as specified in DIN 1840	yes
Operating forces	class 1
CE mark	yes

SUSTAINABILITY

Corrosion protection class	class 5
Uf-value frame ?	1,5 W/(m ² ·K)
Wind load resistance	C5/B5
Certificates	cradle2cradle SILVER

FUNCTIONS

Barrier-free	? 20 mm
Break-in resistance	up to RC 3
Opening type to the outside	side-hung, projected top-hung, projected side-hung, horizontal pivot, vertical pivot
Opening type to the inside	turn/ tilt, side-hung, bottom-hung, double-vent turn / tilt / side-hung, double-vent side-hung / side-hung, tilt / slide, toplight, horizontal pivot, vertical pivot, tilt-before-turn

We are experts in designing, manufacturing and installing complex facades.
