

WINDOWS

AUSSEN ÖFFNENDE FENSTER RIVA AWS 114 SG

Excellent thermal insulation and versatile implementation possibilities. The outward opening windows from BENEDICT + RIVA are impressive with excellent thermal insulation, versatile implementation possibilities, and easy processing. The comfort level in the building is significantly increased with outward opening windows from RIVA, not least through the space that is gained. With a maximum size for top-hung windows of 2000 mm x 2000 mm and optional concealed fittings, there is a high degree of design freedom for the rigorous requirements of apartment and home construction.

- Suitable for use in private apartment and home construction, as well as in commercial real estate
- Center gasket in co-extrusion
- Different opening types, optionally with concealed fittings

DESIGN SPECIFICATIONS

Element width max.	2700 mm
Element height max.	3600 mm
Surface	powder, anodizing, varnish
Overall system depth min. - max.	77 - 121 mm

TECHNICAL SPECIFICATIONS

Fall prevention	yes
National technical approval	yes
CE mark	yes
Drainage	yes

SUSTAINABILITY

Recyclable	yes
Uf-value frame ?	1,9 W/(m ² · K)
Wind load resistance	C5/B5

FUNCTIONS

Break-in resistance	up to RC 2
Max. sound insulation R _{wP}	43 dB(A)
