

PANORAMIC GLAZING

**/ SCHIEBETÜR RIVA
SLIDE 20 SG.SI**

Sliding window / door RIVA Slide 20 SG.SI in ultra-modern design for maximum transparency. The inside and outside become one space: Frameless sliding windows from BENEDICT + RIVA enable a flowing transition between rooms and outdoor areas. For a limitless sense of space that meets the most modern design requirements. The sliding window / door RIVA Slide 20 SG.SI also enable the utmost transparency in transit areas. The frameless design opens up high filigree design possibilities for architects and planners; it has an elegant and reserved effect.

The sliding window / door RIVA 20 SG.SI can be adapted to your individual desires; there are no limits to your creative design freedom, without dispensing with energy efficiency through insulating materials. Maximum barrier-free access is enabled through the thresholdless transition. On request the frameless sliding windows from BENEDICT + RIVA can also be equipped with an electric opening mechanism.

DESIGN SPECIFICATIONS

Face width 45 mm

Face width window frame min. - 30 - 50 mm
max.

Face width casement frame 45 mm
min. max.

Face width mullion min. - max. 30 - 45 mm

TECHNICAL SPECIFICATIONS

Fall prevention yes

Number of tracks single-track, double-track,
triple-track

Barrier-free operating force as
specified in DIN 1840 yes

National technical approval upon request

SUSTAINABILITY

Differential climate behavior class 5

Corrosion protection class class 5

Corrosion category for profiles up to C5H

Passive house yes

FUNCTIONS

Barrier-free ? 20 mm

Mode of operation electrical

Fire classification B2

Characteristics sun protection, heat
protection, privacy
protection
